This scorecard will be used to score Alternate Course Record Fire Qualification when the 25m (NSN 6920-01-167-1398) or 15m (NSN 6920-01-167-1396) scaled silhouette target is used. The Alternate Course will be used only when standard Record Fire and known distance ranges are unavailable.

NOTE: If zeroing/grouping exercises are not performed on the day of Record Fire, six rounds of training/sustainment ammunition will be fired for 25 meter zero confirmation prior to conducting the Qualification Course.

CONDUCT OF FIRE

Table 1. Prone Supported or Foxhole Supported Firing Position. The firer is given one 20-round magazine to engage 10 silhouettes on the target. Table includes two rounds for each silhouette from the prone supported position. Firing must be completed within 120 seconds. No more than two hits for each silhouette are scored.

*The foxhole supported firing position may be substituted for the prone supported position at the unit commander's discretion.

Table 2. Prone Unsupported Position. The firer is given one 10-round magazine to engage 10 silhouettes on the same target sheet. Table includes one round for each silhouette from the prone unsupported position. Firing must be completed within 60 seconds. No more than one hit for each target will be scored from the prone unsupported position.

Table 3. Kneeling Position. The firer is given a final 10-round magazine to engage 10 silhouettes on the same target sheet. Table includes one round for each silhouette from the kneeling position. Firing must be completed within in 60 seconds. No more than one hit for each target is scored from the kneeling position.

NOTE: Alternate Course Qualification firers will have one 20-round magazine and two 10-round magazines. Firers should engage targets on the sheet from left to right, and nearest to farthest (50m, 100m left, 100m center, 100m right, 150m left, 150m right, 200m left, 200m right, 250m, and 300m last). This "guideline" for target engagement is intended to ensure firers do not forget which targets they engaged during qualification. It also alleviates the possibility of shooting each target more than the prescribed amount of times.

Though the time between each firing position is not specified, enough time should be allotted to allow the firer to clear his weapon, quickly change firing positions, and reload before the beginning of the next firing table. The range RSO will ensure enough time is given between each change in firing positions to facilitate the timely flow of the Record Fire Qualification table.

SCORING

The same target sheet is used for every 40-round qualification table a firer completes. One hit is awarded for each round that strikes within or touches some part of the silhouette. A maximum of four hits for each silhouette on the same target sheet are scored.

THE WHITE DOT ON EACH TARGET SHOWS THE CENTER OF MASS AIMING POINT. BULLETS SHOULD HIT WITHIN THE CIRCLE, BUT ARE SCORED AS HITS IF THEY HIT ANY PART OF THE SILHOUETTE.
